DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art teaches the use of a data recording device adapted to record a series of image data in memory and a system to manage the plurality of files in the memory with a directory structure. Furthermore, the prior art teaches the use of a specifier for specifying files to be deleted and a file mover and judge to move files and calculate remaining capacity of the memory. The prior art teaches the use of a file restorer for restoring deleted files from a temporary delete folder to an original directory position in accordance with a users manipulation. However, the prior art does not teach the use of a judging circuit for determining if a file having the same file name as that of the specified file in the memory specified by the user when the file is restored from the temporary delete folder and changing the file name of the specified file to a file name different from any of the file names if it is determined that the file having the same file name is present in memory. Therefore, the claims are allowed over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
